

Care & Maintenance

Acrylic Countertops

Thank you for choosing acrylic countertops from DDN! With proper care, your surfaces will stay beautiful and durable for years to come.

Daily Care & Cleaning

- Wipe with a damp cloth or sponge using warm water and a mild dish soap.
- For routine spills, simply rinse and wipe dry with a soft cloth to avoid water marks.
- Use a non-abrasive household cleaner (e.g., 409°, Fantastik°, Simple Green° or a mild all-purpose cleaner) for tougher messes.

Removing Stains and Marks

- For light stains or residue (e.g., hard water spots, soap scum), use a soft sponge or cloth with a mild abrasive cleaner like Soft Scrub® or baking soda paste.
- For dull areas or stubborn marks, lightly scrub in a circular motion with a non-abrasive scrub pad (e.g., Scotch-Brite® Non-Scratch). Rinse thoroughly and wipe dry.
- DO NOT use abrasive cleaners meant for pots and pans. They may cause permanent scratching.

Scratches, Heat Damage, and Impact Prevention

- Always use a cutting board. Avoid cutting directly on the countertop.
- Use trivets or hot pads under hot pots, pans, slow cookers, and heat-generating appliances.
- Avoid dragging heavy or sharp objects across the surface.
- Avoid dropping heavy objects on the surface, especially around seams or corners. Note: Acrylic can be professionally refinished if scratched or dulled—ask us about repair services.

Sealing & Polishing

- Acrylic surfaces are non-porous and do not require sealing.
- DDN Acrylic countertop surfaces come in a semi-matte finish. Occasional buffing with a soft pad restores the original texture. Do not overdo this.

Repairability

- One of the best features of acrylic solid surface countertops is that they are renewable and
- · Minor scratches, stains, and burns can often be sanded or buffed out. Contact us for instructions.
- Deeper damage may be repairable by a professional—contact us for service options.

What to Avoid

- Do not use harsh chemicals like paint stripper, acetone, or oven cleaner.
- Avoid abrasive tools like steel wool or dark-colored scouring pads, which may scratch or leave
- Don't stand, sit, or place excessive weight on overhangs or unsupported areas.
- · Avoid letting water sit for long periods, especially around faucets—dry after use to prevent mineral buildup.
