#### WHAT IS QUARTZ?

Quartz is a man-made engineered stone that combines natural quartz crystals with resins, pigments, and other additives. This composition gives quartz countertops a unique blend of strength, durability, and aesthetic appeal.

#### WHY DDN QUARTZ?

- **Directly Sourced:** DDN acts as the fabricator *and* direct supplier. This means more control over material availability.
- **Competitively Priced:** DDN understands local quartz market conditions, and prices its quartz slabs accordingly to compete with other local suppliers and fabricators.

Photos and samples reflect small portion and typical pattern of full quartz slab. Physical sample best represents material. Final slab material may vary in color, pattern, chip size, etc.. Please contact us for more information.

## QUARTZ COLLECTION

3cm

#### CALACATTA GOLD NOTE:

DDN's Calacatta Gold quartz is a directional, veined material. Unless specifically requested (additional cost), DDN will not bookmatch-seam countertop pieces or backsplash pieces together. This material will be fabricated and installed directionally-aligned only.

Photos and samples reflect small portion and typical pattern of full quartz slab. Physical sample best represents material. Final slab material may vary in color, pattern, chip size, etc.. Please contact us for more information.
